
Designing Nature's Next Classroom: SBPPS Collaborates with SBPCoAD to Create a Greener Campus

Pune, Maharashtra | 22nd July, 2026

In its continued commitment to environmental sustainability, S.B. Patil Public School has initiated a collaborative project with S.B. Patil College of Architecture and Design (SBPCOAD) to develop a dedicated butterfly garden and enhance the landscaping across the school campus. The initiative aims to enrich biodiversity, create vibrant green spaces, and provide students with an immersive environment to learn about nature and ecological conservation.

As part of this collaboration, Ar. Neelima Bhide, Associate Professor of Landscape Architecture, visited S.B. Patil Public School to discuss the proposed project with the school leadership team. The meeting focused on designing sustainable landscapes that support native flora, attract butterflies and pollinators, and further strengthen the school's green initiatives. Through this partnership, the institution continues to reaffirm its commitment to environmental responsibility while creating a beautiful, nature-rich campus that inspires learning and nurtures a deeper appreciation for the natural world.
