
Exploring the World, One Landmark at a Time: A Visit to Jijamata World Park

Pune, Maharashtra | 21st October, 2026

Learning goes beyond textbooks when curiosity leads the way!

On Wednesday, 21st October, 2026, the students of Grade 3 of S.B. Patil Public School visited Jijamata World Park, Pimple Saudagar, Pune, for an exciting educational outing filled with exploration, discovery, and joyful learning.

The students were fascinated by the miniature models of famous monuments and landmarks from different parts of the world. The visit offered them an opportunity to learn about different countries, discover their iconic structures, and broaden their understanding of the world around them.

One of the highlights of the visit was discovering how waste materials can be reused to create beautiful and impressive structures. This hands-on exposure helped students appreciate the value of recycling, responsible waste management, and keeping our surroundings clean.

The outing provided a wonderful blend of knowledge, environmental awareness, and fun. Exploring the park with their classmates and teachers made the experience even more memorable, encouraging teamwork, curiosity, and learning through observation.

At S.B. Patil Public School, we believe that every journey can open up a world of possibilities—and every little discovery can inspire a big idea!
